Very nice and useful data compilation which was very time intensive! I have two small remarks. 1. Please go through the paper and check the spelling for 'data set'. It is spelled as 'dataset' and 'data set' - it should be consistent. 2. The data set title as archived at PANGAEA is misleading: EPOCA/EUR-OCEANS data compilation on the effects of ocean acidification, 1 January 2008- 31 December 2009. I would expect data measured in the time frame from 1 January 2008- 31 December 2009 and not the time frame of data mining.
